About the College

The Government of Assam established Pandit Deendayal Upadhyaya Adarsha Mahavidyalaya at Amjonga in the district of Goalpara with financial support from the Rashtriya Uchchar Shiksha Abhiyan (RUSA). The institution bears the name of Pandit Deendayal Upadhyaya, a renowned sociologist, philosopher, and prominent thinker of the nation. With a clear focus on science education that is accessible and affordable to all segments of society, the government project to construct the college aimed to deliver higher education of a quality comparable to that offered in the greatest institutions in the nation. The foundation of the college was laid on 29th October, 2014 and through continuous efforts of the Department of Higher Education and the RUSA, the institution has finally been able to open the gate for the first batch of students from the academic year 2017-18.

The institution is located in the Goalpara district's Amjonga, a charming and mesmerising little village that is about 7 kilometres from Dudhnoi, the headquarters of the Rabha Hasong Autonomous Council. The infrastructure of the college is situated on a large campus that covers 25 bighas of land. With a well-stocked library, digital classrooms, modern

laboratories that are conducive to teaching, learning, and research, along with residential facilities for college personnel and female students, the college's peaceful and verdant campus has the ideal ambiance. Although the college's infrastructure has not yet been finished, it is hoped that with the honest efforts of the relevant authorities, it would be finished soon. A vast array of highly skilled and committed teachers give their all to impart education while keeping an eye on the students' general development. The university currently provides a Higher Secondary course in the Science stream through the Assam Higher Secondary Education Council (AHSEC) and a Bachelor of Science (B.Sc.) programme through Gauhati University. In the upcoming years, the institution has a grand goal to provide many courses in skill development as well as postgraduate course.

About the Course

Students can create a strong mathematical foundation by starting with the fundamentals of mathematics. Understanding these fundamental ideas is essential for mastering mathematics. Advanced mathematics immediately becomes complex for students if they lack a fundamental understanding of the number system, ratio and proportion, indices, logarithm, progression, sets, relations, functions, trigonometry, limits, continuity, primary differentiations, and integrations. Thus, it is essential that students possess a firm understanding of the mathematics concepts.

Syllabus of the Course:

Number System: Natural numbers, Whole numbers, Integers, Rational numbers, Irrational numbers, Real numbers, Complex numbers.

Indices: What is index, properties of indices, Examples.

Area and Volume: What is area, find area of different type of shapes like circle, triangle, quadrilateral, polygons. What is volume, find volume of cube, cuboid, sphere, cylinder and cone.

Trigonometry: Trigonometric functions, relation between them, applications of trigonometry, find the value of trigonometry ratios of different angles using ASTC rule.

Progression: What is arithmetic progression, find nth term and sum of first nth terms of AP and problems on arithmetic progression. What is geometric progression, find nth term and sum of first nth terms of GP and problems on GP.

Logarithm: Definition of logarithm, Natural logarithm, General logarithm, properties of logarithm, use of logarithm.

Sets: Definition of set, examples, representation of sets, different type of sets, operations on sets, applications of sets.

Differentiations: Definition of derivative, Derivative of some standard functions, applications of derivatives.

Ratios and proportions: Definition of ratio and proportion, properties and applications.

Integrations: Definition of integration, integration of some standard functions and application of integrations.

Complex numbers: Definition of complex numbers, representation of complex numbers in Argand plane, conjugate, modulus and argument of complex numbers and polar representation of complex numbers.

Measurement of land: Units of land measurement, Measurement of different shapes of land. Conversion of one unit to another unit.

Relations: Definition of relation, different type of relations and examples of relations.

Functions: Definition of function, different type of functions, examples and applications.

Measurement of wood: Units of measurement of wood, Measurement of different shapes of wood.

Measurement of sand: Units of measurement of sand, Measurement of sand contains in tractor and dumper.

Measurement of gold: Units of gold measurement, Measurement of different amount of gold and related prices. Conversion of one unit to another unit.

Who can Join?

1. Under graduate students from Arts, Science and Commerce.
2. School teachers from Primary to Higher Secondary level.
3. Dropout students.

Introduction:

In the recent time, skill-based education is of utmost importance for students. Learning and acquiring the knowledge of English in everyday life has become a basic need for everybody. English plays a pivotal role in each and every sphere, apart from academic or educational institutions, courses and subject modules. By looking at the global significance of the language, the Department of English, PDUAM, Amjonga designs the Certificate Course in "Spoken English and Communication Skills" for the overall growth and benefit of the students. The four language skills listening, speaking, reading and writing are emphasized with the stress on accent, rhythm of speech and correct usage of the language. Active and participatory involvement of the learners are desirable for a fruitful outcome.

Objectives of the Course:

- To enable the learners to understand the basic concepts of Spoken English with phonetics, pronunciation and accents.
- To acquaint the students with correct grammar and composition while using the language.
- To help students to write English correctly for various academic and creative purposes.
- To groom the learners with the techniques of conversations in real life situations, facing interviews, public speaking etc.

Course Module: (Total Marks-40, Credit-4)

Unit 1: Introduction to Spoken English

- Concepts, functions, usage and social relevance
- Correct application of the language
- Phonetics, pronunciation and accents
- Importance of English language in Indian/global context.

Unit 2: Basics of Grammar and Vocabulary

- Parts of speech
- Structures of sentences such as statements, interrogative, exclamatory
- Usages of verb, preposition, voice change, articles, determiners, narration

Unit 3: Writing Skills and Creative Writing

- Writing correct English
- Applications, articles, report writing
- Factual and fictional description
- Creative writings such as poems, stories, magazine, newspaper
- Blog and content writing

Unit 4: Conversation in English

- Situation based conversations
- Group discussions
- Practice sessions as news reader, anchor, public speaking
- How to face job interviews
